

Jeff Hogg

Full-Stack Developer

✉ jeffhogg@gmail.com ☎ [832-684-7072](tel:832-684-7072) 📍 The Woodlands, TX 🌐 jeffhogg.com 💼 linkedin.com/in/jeffhogg

Summary

Full-Stack Developer with enterprise engineering experience across modern React/Node.js applications, legacy system migrations, and relational databases. Extensive background leading end-to-end delivery: building dedicated API middleware, automating CI/CD pipelines, and leveraging AI-assisted developer tooling to optimize SQL stored procedures.

Technical Skills

Languages & Frameworks: TypeScript, JavaScript, Node.js, React, Next.js, Angular, Python, Tailwind CSS

Databases & DevOps: Microsoft SQL Server, MySQL, Docker, Nginx, GitHub Actions, CI/CD, Git, Vercel

Tools & Practices: REST APIs, Model Context Protocol (MCP), Cypress, Kibana, Jenkins, PagerDuty, Agile/Scrum

Experience

LGI Homes

The Woodlands, TX

Full-Stack Developer (Web & Data Administrator)

March 2026 - Present

- Modernized legacy infrastructure via Git and GitHub Actions CI/CD; architected Docker/Nginx container environments with automated SSL and external DNS management.
- Engineered full-stack feature releases for internal business applications with modernized frontends.
- Developed custom Node.js and TypeScript middleware to integrate third-party APIs with on-premise Microsoft SQL Server databases.
- Administered Microsoft SQL Server and MySQL databases, leveraging MCP tooling to profile queries and refactor stored procedures.

Freelance

The Woodlands, TX

Software Developer

July 2024 - February 2026

- Architected and deployed custom web apps using Next.js and Vercel for serverless CI/CD and production hosting.
- Built and launched a Shopify store, customizing frontend architecture to improve user checkout workflows.
- Engineered custom Python and SQL data migration scripts to extract, format, and load legacy data into modern systems.

Cisco

Spring, TX

Software Engineer

December 2021 - June 2024

- Developed scalable enterprise administration features for Cisco Control Hub using Angular and TypeScript.
- Engineered Cypress end-to-end testing suites and monitored Jenkins CI/CD deployment pipelines.
- Maintained platform uptime using Kibana and PagerDuty; partnered across cross-functional Agile teams delivering features via Jira and Confluence.

Technical Director/Camera Op

June 2013 - December 2021

- Operated cameras and directed technical broadcast operations for live multi-camera studio productions, executive communications, and enterprise-scale audiences.

Education

San Francisco State University

B.A. in Broadcast & Electronic Communication Arts
